

HIGHLIFE GAME OUTLINE

When people visit the website for the first time that wish to play games, they will be asked to complete a basic registration form. They will be asked to give basic profile information. They will be asked to select an age range that they are within, gender male/female, create a username and enter their home postal code, then enter their own email address and a mobile telephone number for contact purposes. All this information will then be encoded and stored safely on our server.

The gaming platform will enable potential players to visit a virtual gaming forum with different games rooms of different levels of play. Players will then be invited to register to join first level games with players in the same age group. They will then be invited to sit at a game table with 4 other players of same age group.

At the start of every game a player will be issued a set starting float of 50,000 HECUs (Game Currency), plus any HECUs they gained via GEO location visiting of sponsored Highlife Games Ltd advertisers, or friend referrals. A player will be assigned a Token to use as their playing piece in a game. Each player will play in the role of an acting Account Manager for HIGHLIFE, looking to gain Client Accounts to place Workers on and get paid in different ways and look to gain personal Assets of lifestyle. Aim is to win a game and gain status as an Account Executive and qualify to play prize games. Just as in life, it will not always go their way, they will need to use both conative thinking and small amount of luck to gain and keep 10 different Asset Items to win. The object is to win a game and get credited with a full prize game seat ticket, to play at next level for real prizes.

The game seat tickets can be gained in parts. Each ticket will consist of 5 different parts; all parts must be held to form a whole seat ticket. The ticket when whole is surrendered to gain a seat at a prize game. Players will be allowed to purchase any 2 missing sections of a ticket for a set price online on day of starting a game. We will have Bronze; Silver; Gold; Platinum; and Diamond prize ticket level seat games. All prize games will commence with 5 players at the start but could end with only 2 players competing for the prize.

Some players could be using mobile phones and others could be using a Tablet or computer. All players will see the same screen active layouts, but some information may be presented in a different form. All functions of players actions will be controlled by touching the screen or using set keys. The advertising will be paid in set way.

£10,000 (70% of time), Level 3 on THREE faces of Dice.

Green Question Dice

FULL PROFILE OF ACTIONS FOR EACH OF THE GAME BOARD SQUARES AS DETAIL BELLOW

The following screens depict what the players will see when their **Token** lands on individual squares and subroutines that come into play in relation to each move. All options of play open to player have been covered.

When an active players **Token** lands on a **Company Square** the **(H.E.D) Computer** will check to see if the **Client Account** has been issued and to whom, and subject to findings will display 1 of 3 different 1st screens.

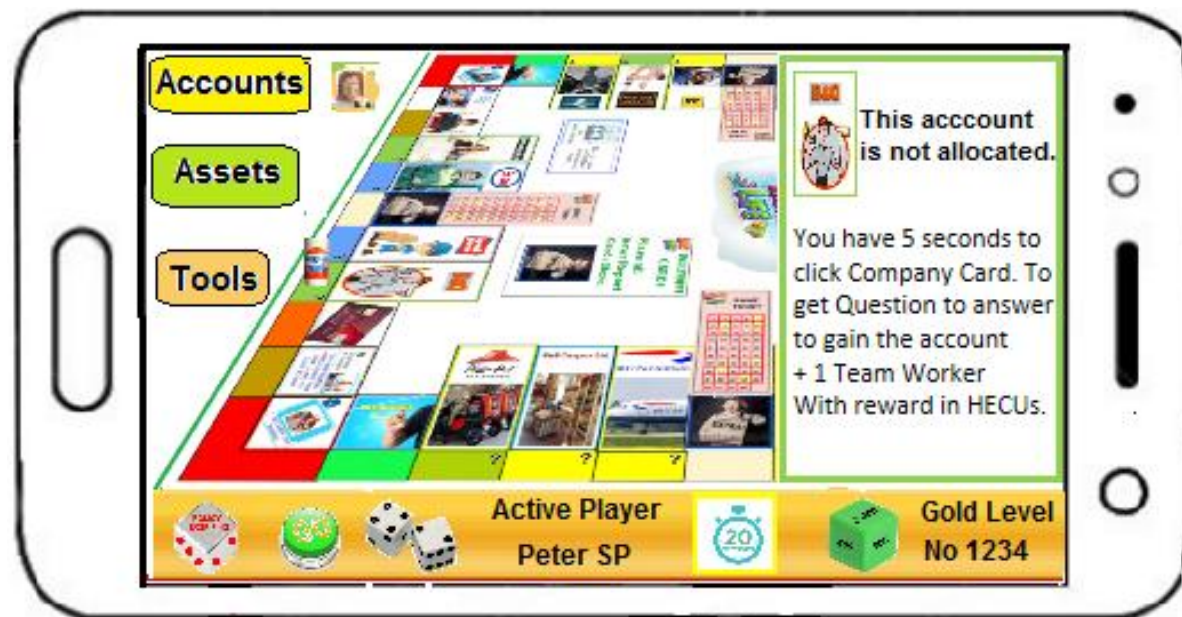

The screen size of the mobile is assumed to be 6.5cm x 11cm.

This is the sequence of screens that will appear when active player lands on **Company Square** that **Client Account** has not been issued.

(1) This is the 1st screen that is displayed to all players when an active players **Token** lands on a **Company Square** where **Client Account** has not been issued:

The **Company Client Account** card is displayed to the right of the **Game Board**. The active landing player will have 5 seconds to click on the **Client Card** to trigger screen (2). With an opportunity to gain the **Client Account** for the **Company Square**, with reward of **HECUs** and 1 **Team Worker**, for answering a question correctly. All other players at this time will see a sponsored advert of one of the advertisers, like screen (5).

Screen 1

(2) This is the 2nd screen which is displayed only to active player when **Token** lands on a **Company Square**, where **Client Account** has not been issued: All other players see screen (5) With advert of a sponsor.

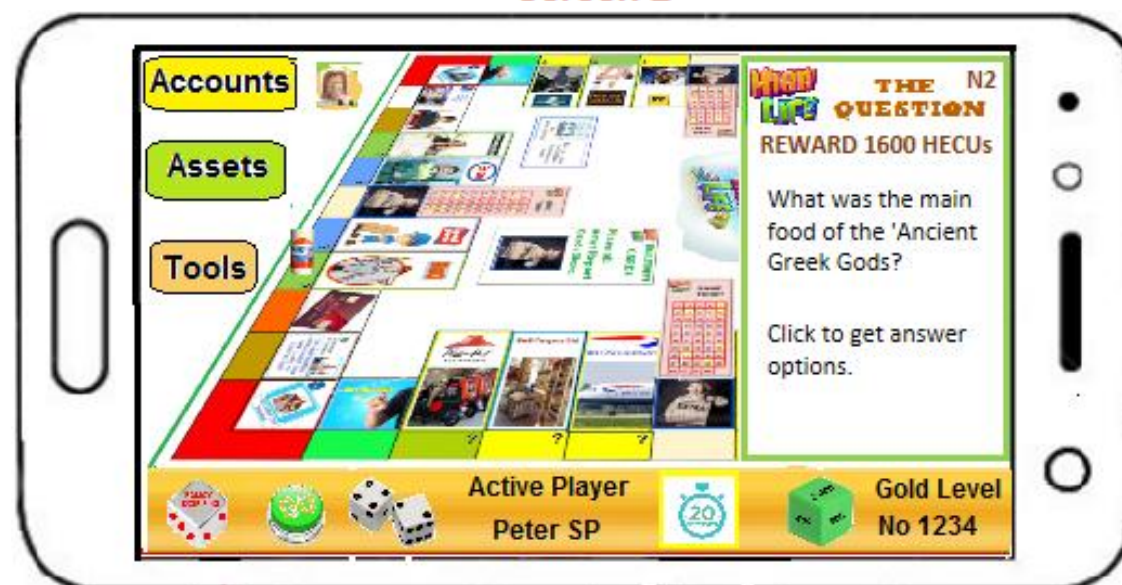

The **(H.E.D) Computer** will automatically spin the same **Coloured Question Dice** and stop it at random to set 1 of 3 reward values of **HECUs** for answering a **Coloured Question** correctly. The question is read aloud to active player only, with 10 seconds thinking time for player to read. Player is then asked to click image to see screen (2a). Answer options are then displayed.

All other players at this time will see advert of a sponsored advertisers, like screen (5).

(2a) This is the 3rd screen that will be displayed to active landing player only with **Coloured Question** answer options : All other players at this time will see advert of a sponsored advertiser, like screen (5).

The **Answer Card** will expand to 2/3rd of screen for player to select 1 of 4 answer options. If they have any **Boffins** to use to help them, they will see them and can click one only to use. If a player uses a Boffin it will remove some of the wrong answers, or change question to help. Then each answer left will be highlighted for 5 seconds in random in turn. They must select the one they think is correct answer whilst it is highlighted, to gain the **Client Account** with reward of **HECUs**. Only 1 answer will be correct. They will be given 5 seconds per answer option of time, to select the right answer, maximum being 20 seconds. If time runs out and no selection made move passes to net natural player in turn.

Screen 2

Screen 2a

Screen 3

(3) This is the 4th screen that will be displayed : To both active landing player and others if the active player selects the wrong answer to the **Coloured Question**.

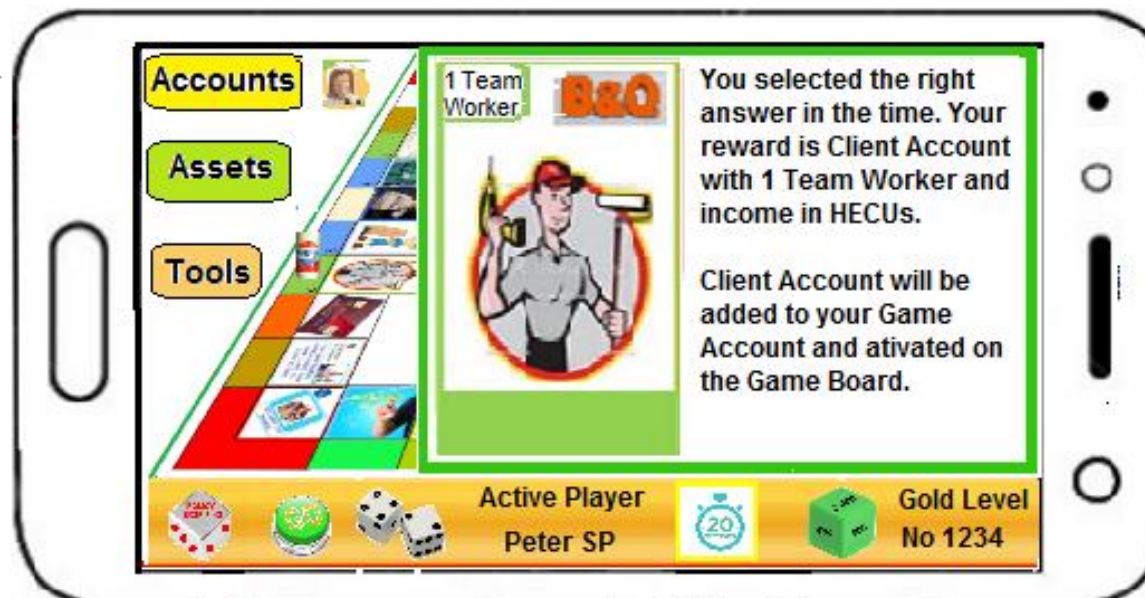

This Screen will be seen by all players for 5 seconds and disappear. Then move passes to next natural player in turn.

Screen 4

(4) This is the 4th screen that will be displayed : To the all players for 5 seconds when active landing player selects the right answer to the **Coloured Question**.

Active landing player will be awarded the **Client Account** with 1 **Team Worker** in place on **Game Board**. The **Client Account Card** and reward of **HECUs** credited to their **Personal Game Account**. Then move passes to next natural player in turn.

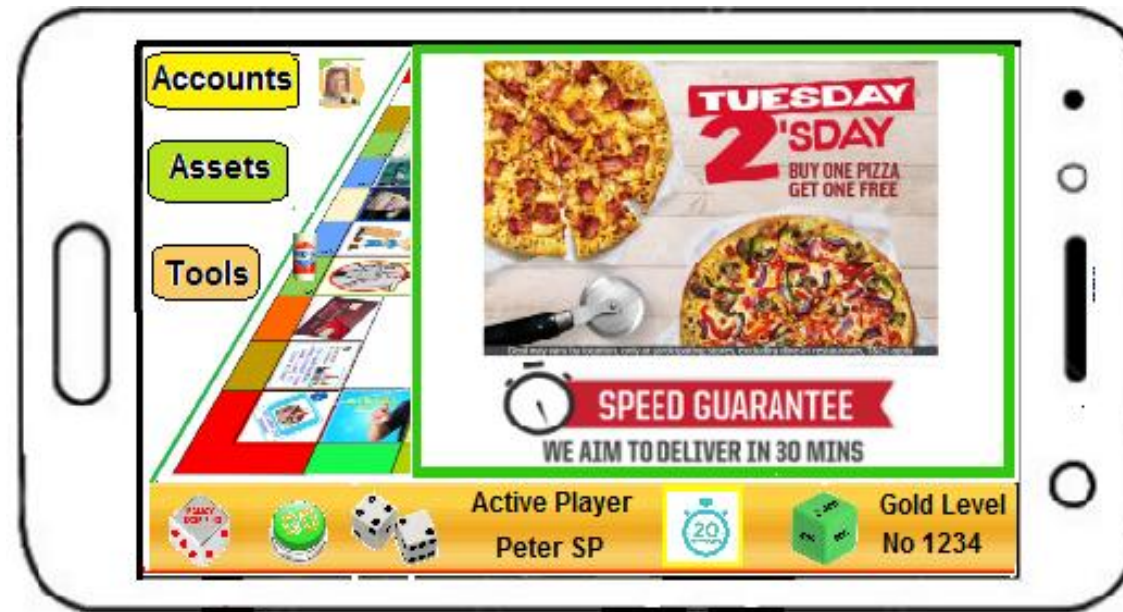

Screen 5

(5) This is an example of the 1st screen displaying a sponsored advert. That is displayed to all players that are not presented with option to answer a Coloured Question.

All other players will be presented with a sponsored advert of one of the games advertisers whilst the landing player is answering the **Coloured Question**. They will have chance at this time to visit and check status of their **Personal Game Account**. As soon as other active landing player has finished move, this advert will disappear.

Then move passes to next natural player in turn and normal game display comes into view.

Example of the screen display when player has clicked **Tools** tag to see contents and status of **Tools** in their account.

Screen 6

(6) This is the example of screen that will be displayed to any single player. That clicks to check status of their **Personal Game Account**, **TOOLS** tag.

This is example of screen (6) that a single player will see when they click on their **Personal Game Account Tools** tag. To see status and details of contents, when it is not their turn to move.

They can double click a **Tool** to see full detail about it. Game play screen is automatically displayed for their next move. They will have 5 seconds to click **Dice** and claim their move or lose it and it automatically passes to next natural player in turn.

Bank Loans have 3 values (£20,000 £40,000 £80,000); TWO of each value available in a game.

A player can only take out a **Bank Loan** when option is offered, if they hold **Asset Items** to pass to **Game Bank** as security and pay **Game Bank FEE** for arrangement of loan of **2 Gold Coins**. The maximum amount the **Bank Loan** can be for is 80,000 **HECUs**. Loan is secured by 50% of **Asset Items** value. These are placed in a clip marked **Loan Security** and left with player). They will then pay interest of 5% of loan amount every 2nd time their **Token** lands on each **Building Society Square**, or **passes** them, until loan is re-paid to **Game Bank**. A **Bank Loan** can only be repaid in ONE full payment when on Building Society Square. No player can win a game with a **Bank Loan** in hand. If player has **Bank Loan** and finds the need to raise more money during play, they can opt to sell **Asset Items** that are held as security to **Game Bank** for 10% of original value and clear loan. **Loan Clip** will show loan value of (20.000 : 40.000: or 80.000). When loan is fully repaid **Asset Items** are unclipped and **Loan Clip** returned

Boffins:

There are THREE different types. All are exchanged only for **Gold Coins** when landing on **Buy Now square**. TWO types will give players help to eliminate wrong answer options and ONE will Change question to be answered. Once **Boffins** are used they disappear and return to **Company Vault** for reissue.

If player ticks anyone of the **Boffins**, the number of **Gold Coins** for the **Boffin** is taken from their **Personal Game Account** and **Boffin** credited.

Gold Coins:

There are **30 Gold Coins** in total in a game. A player may only hold a maximum of 6 unspent at any time.

Gold Coins (1), can be purchased between active goes, clicking on Gold Coin icons for blind purchases). 1 is given every 2nd circuit of board. are Active player when landing, will have 5 seconds either to select to buy 1 to 3 **Gold Coins** at price set randomly by **(H.E.D.) Computer**, (being from 100; 200; 300 **HECUs** each), or to exchange **Gold Coins** held for 1 **Boffin** of choice.

If player enters a number in box for **Gold Coins**, total sum of **HECUs** are taken from their **Personal Game Account** and the **Gold Coins** credited.

Sample of
Loan, Security Clip £20,000

Every 2nd circuit landing on or passing **Building Society square** interest is payable of 5% of loan amount until paid.

Example of Junior Boffin:

This ONE will remove A wrong answer option from ONE question. Cost **2 Gold Coins**

Example of Senior Boffin:

This ONE will remove TWO wrong answer options from ONE question. Cost **3 Gold Coins**

Example of Major Boffin:

This ONE will remove change the question for another one. Cost **4 Gold Coins**

Sample of a Gold Coin

Insurance Broker x 2

When players **Token** lands on **Insurance Broker Square** they have (an option to purchase **Insurance Policy** or renew existing one held). **Insurance Policies** can be renewed when any number between 1 - 5 is shown on the **Policy Time Dice**.

There are 5 different **Insurance Policies** available. Each has different levels of cover and cost. Each **Insurance Policy** is issued to a player with **Policy Time Dice**. Player can only hold 1 **Insurance Policy** at a time. Only 1 of each **Insurance Policy** cover is in the game. A player can surrender 1 held for no value to buy better.

Policy Time Die x 5

Each will be in same colour as **Insurance Policy**, with numbers 1 -5 and word on sixth face Expiring. When issued to player **Die** is set with the number 5 on the top and placed on the **Game Bar** near them under the **Game Board**. Each time their **Token** completes 2 circuits of the **Game Board**, the **Die** is turn to next low number. When word Expiring is displayed and players **Token** passes over **Training Grant Square** the 2nd time the **Insurance Policy** and matching **Policy Time Die** is spent and returned to **Game Bank**, without surrender value.

Basic premium of each Insurance Policy

Basic Policy: Purchase price 500 HECUs
Bronze Policy: Purchase Price 750 HECUs.
Silver Policy: Purchase Price 1000 HECUs.
Gold Policy: Purchase Price 1200 HECUs.
Platinum Policy: Purchase Price 1500 HECUs.

Example of Silver Time Dice

There would a matching colour **Dice** for each **Insurance Policy Card** number goes down by 1 each full circuit of Game board.

Example of Silver Insurance Policy

Certificate of Insurance
Cover: Level Silver
Premium is 1000 HECUs

Covers player from potential loses when rolling any odd number 6 or 12 in single go.

Policy may only be purchased, or renewed on Insurance Broker Sqaure. Covered runs whist Time Dice shows 1 to 5 until lost. Policies are returned to Game Bank without value. PLayer can only hold 1 policy at a time.

This is the sequence of screens that will appear when active player lands on **Company Square** when **Client Account** has been issued to another player .

(7) This is the 1st screen that will be displayed to all players when active players **Token** lands on a **Company Square**: where the **Client Account** is held by another player. All players will see this screen.

Active landing player will be presented with a **Consultation Fee** bill for visiting other players **Company Square**. The fee is selected at random by **(H.E.D) Computer** from 1 of 3 for that colour level, which is then multiplied by number of **Team Workers** on the account, to get total to be charged, with tick box to make payment.

If player has enough **HECUs** to pay, they have 5 seconds only to tick box to make payment which is then credited to **Personal Game Account** of holder of **Client Account**. Or they will be processed as a **Bankrupt** by default.

Then move passes to natural next player.

If player is short of **HECUs** to pay **Consultation Fee**, screen (8) will pop up when player ticks box to pay.

Screen 7

(8) This is the 2nd screen to be displayed to active player when **Token** lands on **Company Square**: If **(H.E.D.) Computer** finds player has less than required **HECUs** in **Personal Game Account** to pay **Consultation Fee** to **Client Account** holder. All players will see this screen

If player is short of **HECUs** to make payment **(H.E.D) Computer** will offer up to 4 options to raise **HECU**, subject to **Luxury Assets** and status of the contents of their **Personal Game Account**. Player will have 10 seconds to select an option or will be processed as **Bankrupt** by default. Then move passes to next player in turn.

Maximum options that could be offered are:

- (1) Get **Bank Loan**; See screen (9).
- (2) Sell secured **Asset Items** to bank to clear **Bank Loan** see screen (10).
- (3) Hold **Drop Auction** to sell some **Asset Item/s** see screen (11).
- (4) Sell **Asset Items** back to **Company CEO Vault** see screen (12).

Screen 8

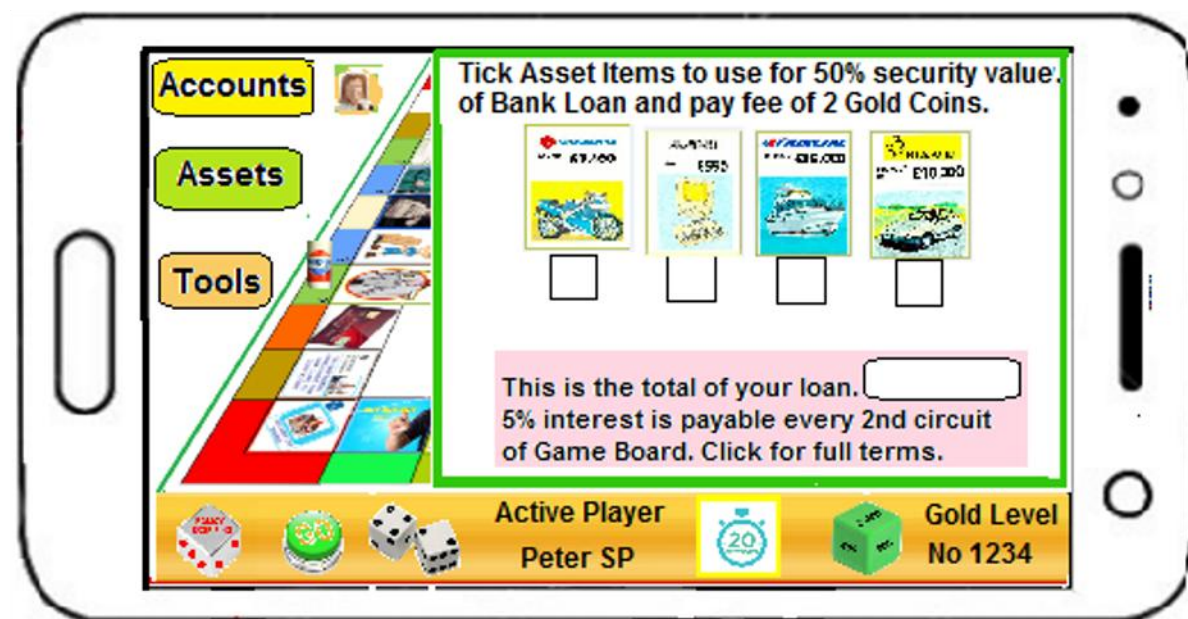

(9) This is the 2nd screen to be displayed to all players when active landing player opts to take out a **Bank Loan**:

(H.E.D.) Computer will display landing players **Asset Items** with values and tick boxes. Player will only have 15 seconds to select **Asset Items** to use as 50% security for **Bank Loan** and pays **2 Gold Coins**.

Once **Asset Items** are selected, total value of loan is displayed. Any debts are automatically paid, then balance of **HECUs** credited to players **Personal Game Account**. **Asset Items** used as Security are placed in **Loan Clip** in players **Personal Game Account**.

(1) Arrange **Bank Loan**.

If no options taken to raise **HECUs** to make full payment, or 15 seconds of time passes with no action taken. Player will be processed as **Bankrupt** by default. Then move passes to next natural player in turn.

Full terms of the Bank Loan:

You have to pay interest of 5% every 2nd circuit of the Game Board, when passing or landing on the Building Society Square. At this time you will be given an option to either just pay the 5% interest or pay off the Bank Loan. You can only pay the loan off in one payment in full. If you cannot meet a payment on time for any reason, you will be processed as Bankrupt. You cannot win a game holding a Bank Loan.

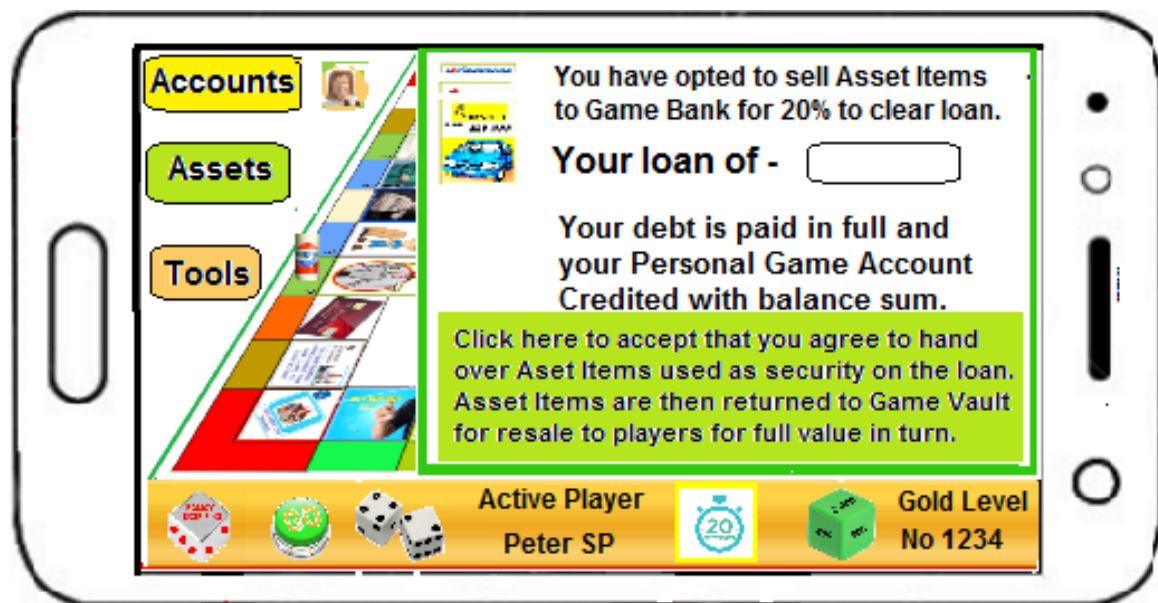

(10) This is the 2nd screen to be displayed to all players when active landing player opts to sell **Asset Items** used as security to clear a **Bank Loan**.

(H.E.D.) **Computer** will display landing players loan value. Player has 5 seconds to tick box to sell to **Game Bank** for **20% of Asset Items** value. Then bank will automatically pay debt on behalf of landing player and credit players **Personal Game Account** with any balance. All **Asset Items** used as security are purchased by bank and returned to **Game Vault** for reissue at full value with **Stars**.

If no option taken to raise **HECUs** to make full payment, or 5 seconds of time passes with no action taken. Player will be processed as **Bankrupt** by default.

Then move passes to next natural player in turn.

Screen 10

(11) This is the 2nd screen to be displayed to all players when active landing player opts to sell **Asset Items** via an **Open Drop Auction**.

(H.E.D.) **Computer** will display landing players **Asset Items** that they hold. They will have 10 seconds to click on the ones to place into the **Open Drop Auction** and pay **2 Gold Coins**. Invites are then sent to all other players to bid in the auction. All players will have 5 seconds to respond to invite to bid. Then **Auctioneer** will appear on screen and announce terms of bidding and buying. See screen (11a).

(3) Hold **Open Drop Auction**.

If no option taken to select **Asset Items** to enter into **Open drop Auction**, or 10 seconds of time passes with no action taken. Player will be processed as **Bankrupt** by default.

Then move passes to next natural player in turn.

Screen 11

(11a) This is the 3rd screen to be displayed to all players when landing player opts to sell **Asset Items** via an **Open Drop Auction**:

Once the active landing player has ticked boxes of the **Asset items** to be entered into the **Open Drop Auction** and 2 Gold Coins as entry fee. The screen will change to show **Auctioneer** on the screen. See Screen (11a) *Auctioneer will announce ("The auction will start shortly, each **Asset Item** starting at full price in the auction and drop on screen by 500 a time, every 2 seconds. If you wish to bid for an **Asset Item** click price that you see that you want to pay. The first player to click on an **Asset Item** at a price, buys it automatically. If an **Asset Item** drops down to 10% of the original starting value. Buyer is automatically **Company CEO**"*

Each time an **Asset Item** is sold, buying players **Personal Game Account** is debited with the cost and **Asset Item** is deposited with **Stars**. Once all **Asset Items** to be auctioned have been sold and the debt is paid, any balance of **HECUs** raised is credited to players **Personal Game Account**. Then move passes to next natural player in turn. If player is unable to clear a debt after an auction, they are processed as **Bankrupt**.

Then move passes to next natural player in turn.

For the purpose of this example player has decided to auction the yacht value 49,000. With items auctioned the buying player will get the value of **Stars** as well.

When **Asset Items** are clicked to go into auction they are removed from screen.

Screen 11a

(12) This is the 2nd screen to be displayed to all players when active landing player opts to sell **Asset Items** back to the **Company CEO Vault**.

(H.E.D.) **Computer** will display landing players **Asset Items** with 20% values and tick boxes. Player will have 15 seconds to select the **Asset Items** that they want to sell back to the **Company CEO Vault**. The total value of **Asset Items** to be sold will appear in the bottom box. Then the total amount of **HECUs** is credited to the players **Personal Game Account** and **Asset Items** returned to the **Company CEO Vault** with Star values.

If no option taken to select **Asset Items**, or 15 seconds of time passes with no action taken. Player will be processed as **Bankrupt** by default.

Then move passes to next natural player in turn.

(13) This is the screen that will be displayed to all players when a player is made **Bankrupt**:

This is the screen that all players will see if a player is made **Bankrupt**. Any **Asset Items** are taken with **HECUs** and **Tools** are returned to the **Company CEO Vault** for resale to other players that are left in play. The player will lose all unused **Boffins**; **Gold Coins**; plus **Points**; **Stars** and **HECUs** that they gained during this game play.

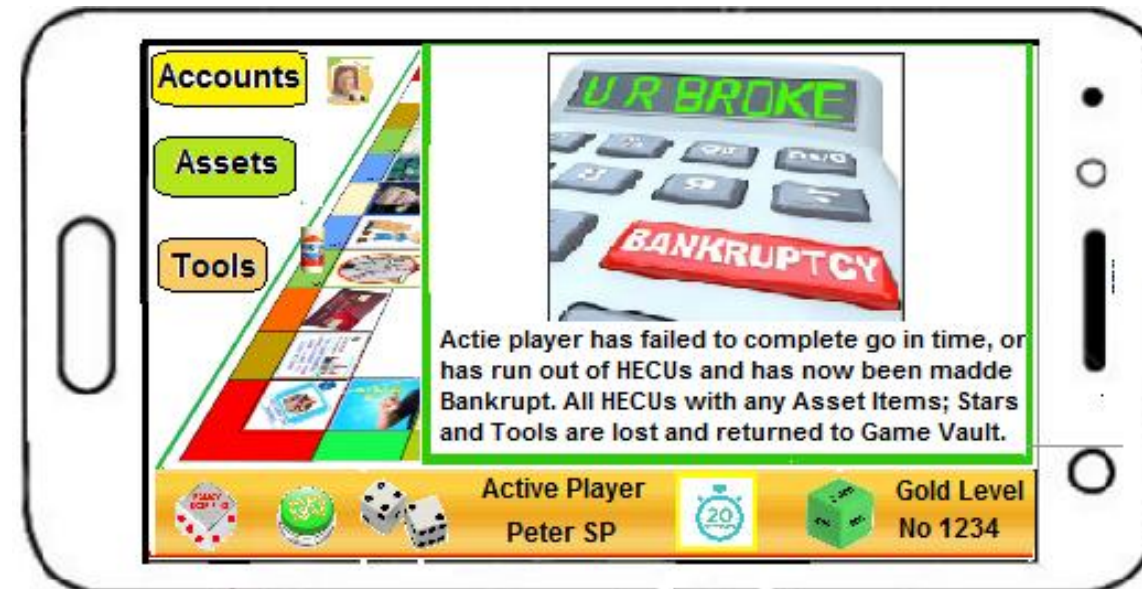

Move then passes to natural next player in turn.

Remaining players will play on to find natural winner. In the event that only 1 other player is left, that player has all **Points** and **Stars** that they gained in this game doubled, as special bonus.

Screen 12

Screen 13

The next screens show what the active player will see when their Token lands on a Disaster Square (HOUSE FIRE as example).

(14) This is the 1st screen to be displayed to all players when active player lands on a **Disaster Square** (Example is, House Fire):

(H.E.D.) **Computer** will check if player has bought **House Asset Item** of any value.

If yes: will run a 15 second video(Owned house on fire), about the house they own being damaged by fire. Then run screen (14a) with video (A).

If player not holding an **Asset Item** of a **House** then a different 15 second video(Rented house on fire), runs with player renting the property. Then runs screen (14a) with video (A).

If (H.E.D) **Computer** runs any video and finds player is covered by insurance. Then runs screen (14a) with video (B).

Screen 14

Screen 14a

(14a) This is the 2nd screen to be displayed to all players when active players **Token** lands on a **Disaster Square** (Example is house fire):

(H.E.D) **Computer** checks if player fully covered by insurance.

(A) If none or partial cover: will run a 2nd 15 second video showing **Insurance Man** presenting a claim valuation with request to pay an excess payment set by (H.E.D) **Computer** as an amount to process claim. (The excess payments will be different on each Disaster Square). The excess payment is automatically taken from the players **Personal Game Account** if funds are there. If not will display screen (8) with options available to raise funds.

(B) If yes player has full **Insurance Cover**, will run a 2nd alternative 15 second video showing **Insurance Man** presenting a claim approval to restore to good state, showing full cover, good news. Then move passes to next natural player in turn.

The excess payments that are possible when landing on Disaster Squares are as follows:

Landing on House Fire	Landing on Yacht disaster	Landing on Car Crash	Landing on plane Crash
5,000 = 60% of the time	10,000 = 60% of the time	1,000 = 60% of the time	30,000 = 60% of the time
10,000 = 30% of the time	35,000 = 30% of the time	3,000 = 30% of the time	60,000 = 30% of the time
40,000 = 10% of the time	50,000 = 10% of the time	7,000 = 10% of the time	90,000 = 10% of the time

If player is holding an Asset Item that is involved in a disaster and cannot afford, or chooses not to pay **HECUs**, to cover damages to restore **Asset Item** to full value. They can accept the loss of the **Asset Item** with no value. This is then returned to **Game Vault** with **Stars** for resale to players.

If player is not holding the **Asset Item** that is involved in a disaster and it is shown as them renting the **Asset Item** and they cannot afford to pay damages for any reason. They will be processed as **Bankrupt**.

The next screens show what all players will see when active players Token lands on a Tax Square.

Screen 15

(15) This is the screen that will be displayed to all players when active player's **Token** lands on **Tax Demand Square**:

The **(H.E.D.) Computer** will select at random a **Tax Demand**, figure to be taken automatically from landing players **Personal Game Account**. This being 1 of 3 sums (500H; 2,500H or 5,000 **HECUs**). No insurance covers this demand.

If players **Personal Game Account** is short of **HECUs** to take payment automatically. Screen (8), comes into play.

The next screens show what all players will see when active players Token lands on the Training Grant Square.

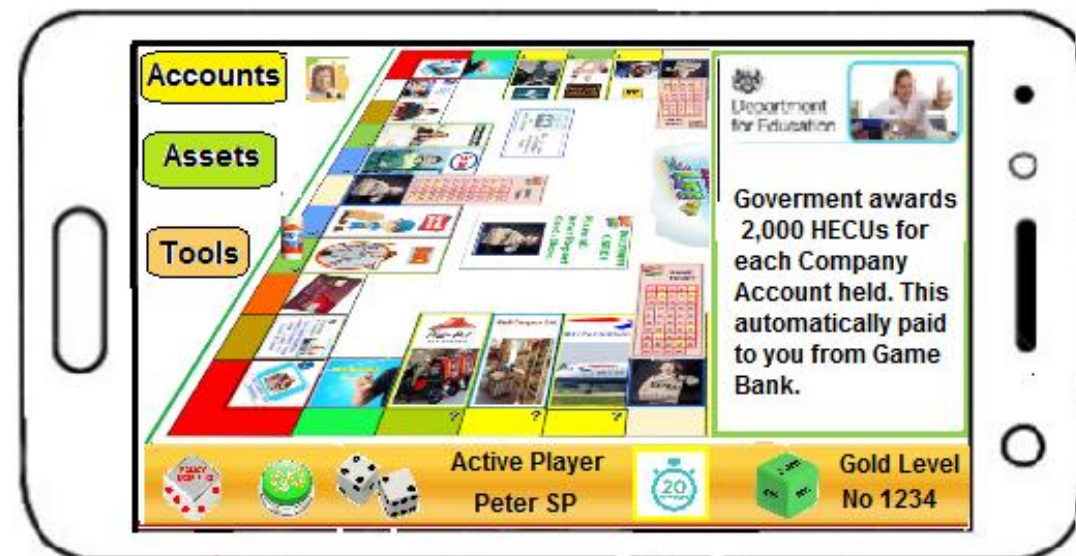

Screen 16

(16) This is the screen that will be displayed to all players when a player's **Token** lands on **Training Grant Square**:

Each player will start the game with the their **Token** from the **Training Grant Square** and then take a turn in rotation.

Then each time a player's **Token** Lands on the **Training Grant Square** a player automatically is paid 2,000 **HECUs** from **Game Bank** for each **Company Client Account** they hold on the **Game Board**.

Their move then ends and passes to natural next player.

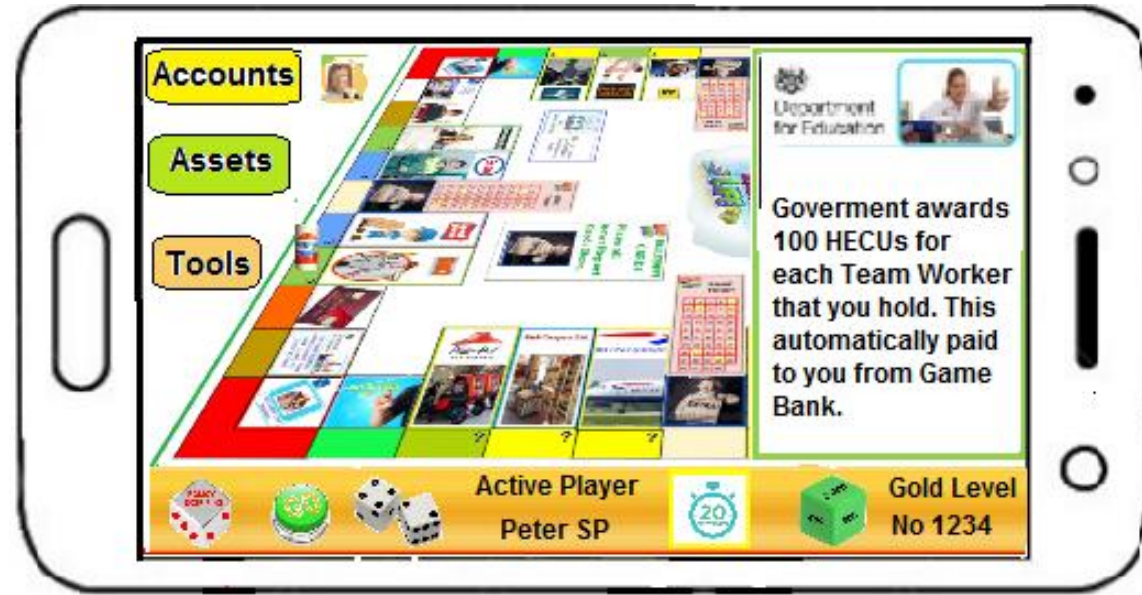

(16a) This is the screen that will be displayed to all players when active player's **Token** passes over **Training Grant Square**:

Each time a player's **Token** passes over the **Training Grant Square** a player automatically is paid 200 **HECUs** from **Game Bank** for each **Team Worker** they hold on the **Game Board**.

Their move then ends and passes to natural next player.

Screen 16a

The next screens show what all players will see when active players Token lands on the News Square.

(17) This is the 1st screen that will be displayed to all players when active player's **Token** lands on **Highlife News Square**:

The first thing to happen is the active player will be given a FREE **Highlife Lotto Ticket** with six numbers preselected. This ticket comes from landing square and is displayed at bottom left of screen on landing.

Then 2 seconds later boy on **News Square** will throw rolled **Newspaper** which lands in display panel and opens. Player will see some news event report for 10 seconds, which could be good or bad news.

If good news player will have chance to make a purchase of an **Asset Item** at discount for 5 seconds, then offer disappears. Up to 2 **Asset Items** will be offered and selected at random from those available in **Game Vault** by **(H.E.D.) Computer**. Player will have 5 seconds to click 1 item to buy. Then **HECUs** are taken from **Personal Game Account** and the **Asset Item** deposited. Then screen (17a) comes into play.

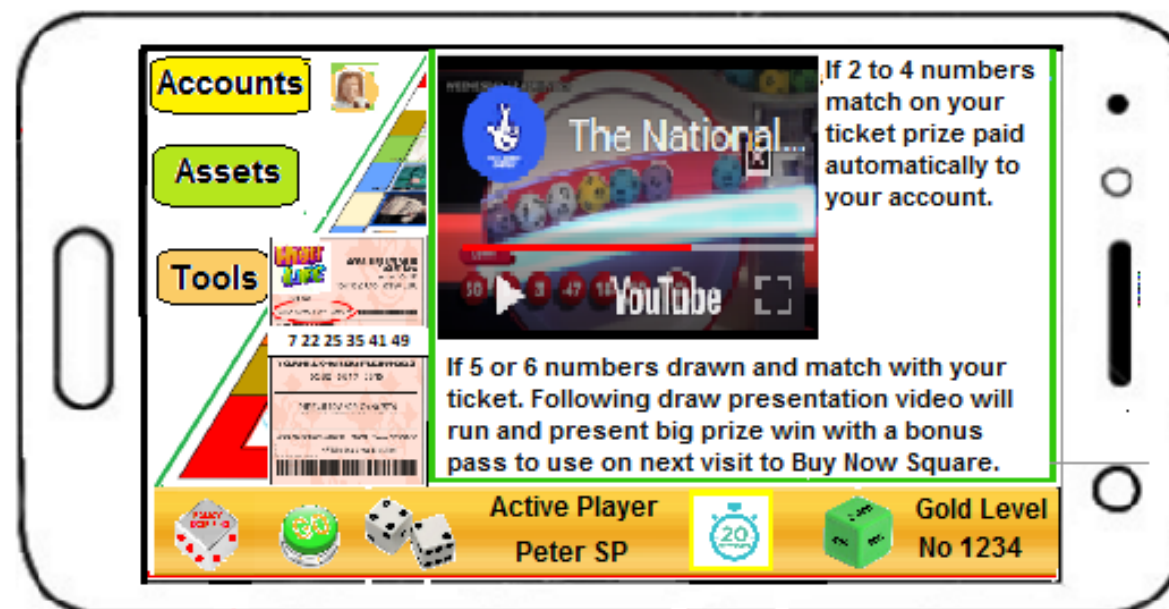

If bad news reported **(H.E.D.) Computer** checks to see if player has cover with insurance. If player not covered, screen (14a) comes into play with video (A) and associated following screens to completion. Then screen(17a) comes into play.

If **(H.E.D.) Computer** reports bad news and player is covered against negative outcome with insurance. Then screen (14a) comes into play with video (B)Then screen (17a) comes into play.

Screen 17

Screen 17a

(17b) **Highlife Lottery** big award is seen by all players.

Lottery official presents cheque to player and award of **Special Ticket** to allow spending spree when landing on future **Buy Now Squares**. **Special Ticket** and the prize of **HECUs** are credited to the players **Personal Game Account**. Then move ends and passes to the next natural player in turn.

Screen 17b

The next screen shows what all players will see when active players Token lands on a Building Society Square.

(18) When active players **Token** lands on a **Building Society Square**. All players will see this screen.

The **Building Society Square** slightly enlarges briefly. Then The following notice appears to inform all players that the Active player is looking to check their investments. They will have 5 seconds to click ATM image for the next **Annual Report Card**, or go ends. When player clicks **ATM** image the next **Annual Report Card** flips over on the stack on **Game Board** and flips into the space at right of screen, and enlarges instantly. All players will see the **Annual Report Card**. Contents are read aloud and reward in **HECUs** automatically credited to players **Personal Game Account**. Card is then replaced at base of pack on the **Game Board** and used in rotation.

Then move ends and passes to the next natural player in turn.

Screen 18

Personal Account.

The next screens show what all players will see when a players Token lands on the Buy Now Square.

(19) When active players **Token** lands on a **Buy Now Square**. All players will see this screen 1st.

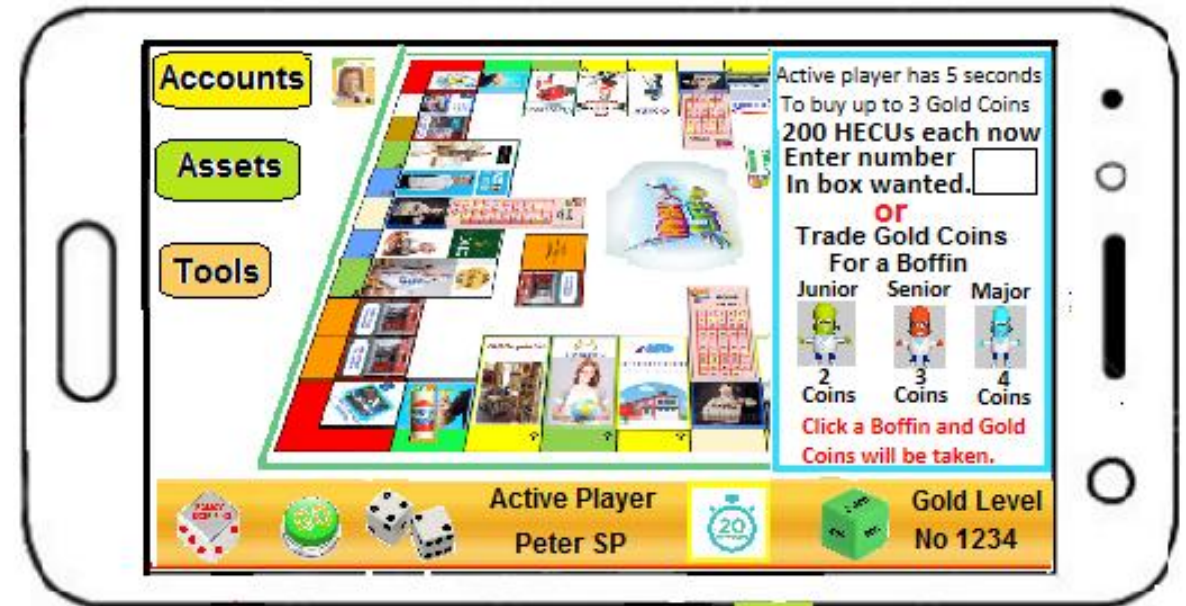

Active player on landing will see message giving them 5 seconds to select either to buy 1 to 3 **Gold Coins** at price set randomly by **(H.E.D.) Computer**, (being from 100; 200;300H each), or player may exchange **Gold Coins** held for a **Boffin** of choice.

If player enters a number in box for **Gold Coins**, total sum of **HECUs** are taken from their **Personal Game Account** and the **Gold Coins** then credited.

Then Screen (19a) will come into play.

If player ticks anyone of the **Boffins**, the number of **Gold Coins** for that **Boffin** is taken from their **Personal Game Account** and **Boffin** then credited. Then Screen (19a) will come into play.

Screen 19

(19a) Comes into play 5 seconds after Screen (19) comes into play when players **Token** lands on a **Buy Now Square**. All players will see this screen.

(H.E.D.) **Computer** will select up to 8 **Asset Item** groups to display at random on the screen. Active player will have 15 seconds to click on up to 3 groups to check availability and costs for **Asset Items**. *If player holds a **Special Buy Now** ticket from winning a big prize in the lottery. The player clicking any Asset Item will trigger the automatic purchase of all highest value Asset Items that player still needs and total cost debited to their **Personal Game Account**.*

In this example player has selected 3 groups to check on availability, which are highlight in red.

After 15 seconds have passed. If **Asset Items** are selected by player on screen, it changes to display screen (19b).

If after 10 seconds have passed and none selected move ends and passes to next natural player in turn.

Screen 19a

(19b) This screen will come into view after active player uses screen (19a) to select **Asset Item** groups to view availability to buy. All players will see this screen.

(H.E.D.) Computer will display all **Asset Items** that are available in the players selected groups to purchase. Player will have 15 seconds on **Countdown Clock** to select 1 to 3 **Asset Items** they want to buy. When a player clicks on an **Asset Item** they automatically make a purchase. The **Asset Item** moves from available display list and is deposited in their **Personal Game Account** and cost in **HECUs** are taken.

After either 3 **Asset Items** have been purchased or 15 seconds have passed the move ends.

If after completing purchases and (H.E.D.) Computer finds active player has collected either a full set of 10 different **Asset Items**, or 37 **Stars** from 8 different groups of **Asset Items**. They will be processed as the winner of the game and any bonuses that they have gained will be applied to their account.

The player that came second will be awarded points and so on. See Points Award Table.

If no player declared as a winner at this time. Move then passes to the next natural player in turn.

Screen 19b

The next screens show what all players will see when a players Token lands on the Insurance Broker Square.

(20) This screen will be seen by all players. When active players **Token** lands on any **Insurance Broker Square**. (they will have option to either buy an **Insurance Policy** or renew existing one held, or upgrade, by surrendering one and buying another). Player may only hold one active **Insurance Policy**.

There is only 5 **Insurance Policies** available in a game. Each has different levels of cover and cost. Active Player will have just 5 seconds to click a briefcase of choice or move ends. Then move passes to next natural player in turn.

If player clicks a briefcase the screen will change to show screen (20a).

Screen 20

Screen (20a) will display all available **Insurance Policies** available to the active player. The active player can only renew an **Insurance Policy** held, when number on **Policy Time Dice** is showing between 1 - 3. A player may upgrade any policy by surrendering one and buying another. All players will see this screen.

Policy Time Die x 5 (different colour for each policy)

Each will be in same colour as **Insurance Policy**, with numbers 1 -5, and on sixth face word expiring. When issued to player **Policy Time Die** is set to the number 5 on display and placed on the **Game Bar** below **Game Board**. It will be visible during their personal moves only. Each time their **Token** completes 2 circuits of the **Game Board**, passing the **Training Grant Square**, the **Policy Time Die** is turn to next low number. When word expiring is turned to be displayed, player has only got cover for 2 more **Game Board** circuits. Then when passing **Training Grant Square** it is lost and returned to **Game Vault**, without surrender value for reissue to a player.

Player has 10 seconds to click on an **Insurance Policy** to buy, from those available. The **Insurance Policy** is automatically transferred to their **Personal Game Account** and **Policy Time Dice** placed on the **Game Bar** below the **Game Board**. The cost of **Insurance Policy** in **HECUs** is taken from their **Personal Game Account** and **Policy Certificate** deposited. Then move ends and passes to the next

Double clicking on a policy will expand to show full size policy as show in this screen.

Basic Policy: Purchase price 500 HECUs (Covers total 2 - 4 thrown on Dice)

Bronze Policy: Purchase Price 750 HECUs. (Covers total 2 - 5 thrown on Dice)

Silver Policy: Purchase Price 1000 HECUs. (Covers total 2 - 6 thrown on Dice)

Gold Policy: Purchase Price 1200 HECUs. (Covers total 2 -7 thrown on Dice and 50% of claims, except Income Tax payments.

Platinum Policy: Purchase Price 1500 HECUs. (Covers total 2 - 8 Thrown on Dice and 100% of claims, except Income Tax payments.

The next screens show what all players will see when a players Token lands on the Credit Card Square.

Screen (21) When active players **Token** lands on the **Credit Card Square**, they are presented with **Credit Card** statement for full payment. All players will see this screen.

Active player will be asked to click payment button within 5 seconds, so payment is then automatically taken from their **Personal Game Account**. If player fails to click in time they are declared **Bankrupt**.

If the money can be taken automatically from their **Personal Game Account** when they click the payment button. The sum is taken and the go finishes. Then move passes to the next natural player in turn.

If the money is not available in the **Personal Game Account** to make payment. Screen (8) comes into play, followed by next screens.

Screen 21

The next screens show what all players will see when a players Token lands on the Account Review Square.

Screen (22) **Company Report Cards** are activated when players **Token** lands on the **Company Report Square** 18 of 20 give award of bonus payment. There will be a stack of 20 different **Company Report Cards**, which are shuffled prior to game start and placed on **Game Board**, to be use during play. Each time a **Company Report Card** is drawn, and actioned they are returned to base of stack. All players will see this screen.

Company Report Cards:

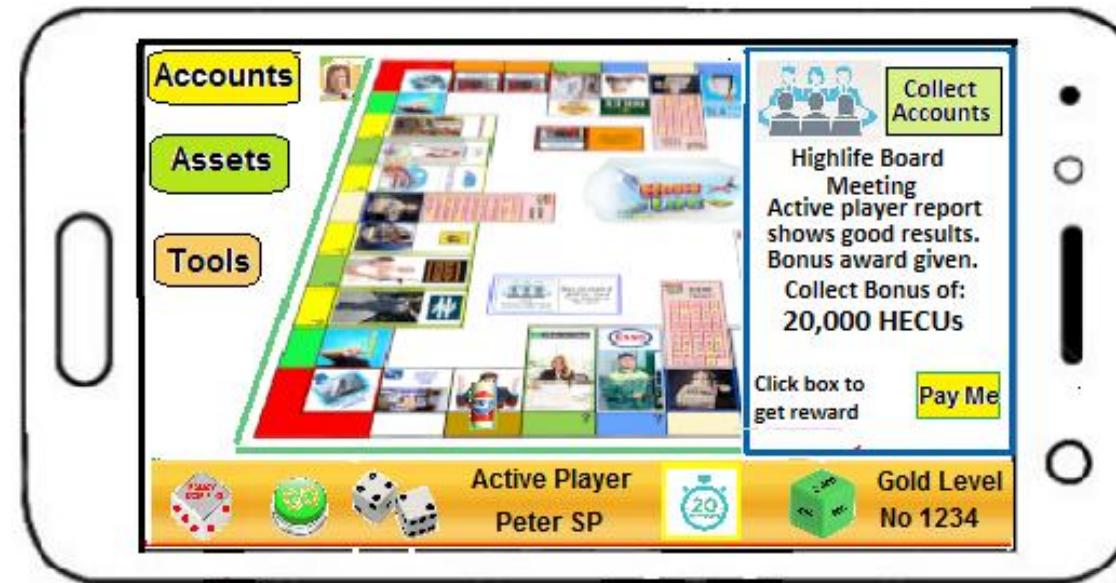

When active player lands on **Company Report Square** next **Report Card** is automatically drawn from the top of the stack on the **Game Board**, which flips over and displays to the right of the **Game Board**.

If player is informed of good news, they will have only 5 seconds to click button to collect any bonus and **Client Accounts** awarded, or all are lost. **HECUs** awarded are automatically paid from **Game Bank** to players **Personal Game Account**, when player clicks the button **(Pay Me.)**

If **Green** button **(Collect Accounts)** is on show it is linked to **(Pay Me)** button and clicked as linked. Any **Client Accounts** collected are transferred to players **Personal Game Account** and activated on the **Game Board** with **1 Team Member**, for the player, without income.

Then move finishes and passes to the next natural player in turn.

Screen 22

Screen (22a) **Company Report Cards** are activated when players **Token** lands on the **Company Report Square**, If (H.E.D) **Computer** flips over **Report Card**, with bad news, being poor report loss of a **Client Account** or accept a fine. All players will see this screen.

If (H.E.D) **Computer** flips over bad **Report Card** which announces a loss of a **Client Account** or pay a fine. Player has 5 seconds to click either the **(Pay Fine)** button to pay fine or click the **(Drop Account)** button to select a **Client Account** to drop, or is processed as **Bankrupt**.

If player clicks **(Drop Account)** button, Screen (22b) comes into play.

If player clicks **(Pay Fine)** button the fine in **HECUs** is automatically taken from players **Personal Game Account**, If it is short of funds to make payment. Screen (8) comes into play.

If player holds **Platinum Insurance Policy** cover when clicking, the button to **(Pay Fine)** 100% of fine is deemed covered by **Insurance Policy**, if **Gold Insurance Policy** held 50% of fine is covered and balance is taken from players **Personal Game Account**.

Screen 22a

Screen (22b) comes into play to drop a **Client Account**. (H.E.D) Computer will select up to 2 **Client Accounts** of player at random to display. All players will see this screen.

Player will have 5 seconds to select one **Client Account** to drop from their **Personal Game Account** with **Star** value, or (H.E.D.) Computer will select one at random for the player. The **Client Account** lost will be put on **Client Account Review Square**, which can then be awarded again to a player with **Star** value.

Any **Team Workers** on lost **Client Account** are automatically reassigned jobs by (H.E.D.) Computer to other **Client Accounts** of player on **Game Board** of same colour. **Client Accounts** can have maximum of 3 **Team Workers**. Player will be automatically charged redundancy payment of **1,000 HECUs** for each **Team Worker** that cannot be reassigned.

Then redundancy payment in **HECUs** is automatically taken from players **Personal Game Account**, for all **Team Workers**. If payments are made, move then ends and passes to next natural player in turn.

If players **Personal Game Account** is short of funds to make any payment. Screen (8) comes into play.

Screen 22b
